SUMMARY

Program manager with more than fifteen years leading enterprise platform transformations in manufacturing finance, procurement and supply chain on Oracle Fusion Cloud and SAP S/4HANA. I run full lifecycle implementations from discovery to business case build to business process redefinition and optimization. I set and manage scope, plan, estimate and schedule. I control delivery against budget. I have governed 25 to 60 systems integrator resources per program and more than 100 on the largest. I delivered 7 Oracle Fusion go-lives in five years. All were on time and on budget. I report status to the PMO and run executive steering committees. I also build and ship enterprise web applications and live dashboards (linked below).

2025 Award Winner, Oracle ERP Supply Chain Excellence.

PROGRAM MANAGEMENT AND GOVERNANCE

- **Planning, estimating and scheduling.** Program plans, work breakdown structures, resource plans and critical path schedules built in MS Project and Excel. Estimates tied to scope. Baselines set at initiation and tracked to completion.
- **Scope, requirements and change control.** Scope set with the business and held under change control. Requirements gathered in discovery and traced to design and test and cutover. Change requests priced and approved before work starts.
- **Budget and forecast control.** Monthly audit of forecast against actual. 97 percent or better EVM budget accuracy. More than \$25M of portfolio under governance. Variances explained and corrected in the next cycle.
- **Risk, issue and dependency management.** RAID logs reviewed every week. Each risk ranked and owned. Dependencies shown on the plan. Escalation paths agreed at kickoff.
- **Status reporting and PMO audit.** Weekly and monthly status for the PMO and for executives. 90 percent or better milestone compliance. PMO content audited for risks, issues and changes. Data quality tracked and improved.
- **Business case and discovery.** Discovery workshops to gather business goals and requirements. Business case and cost estimate to justify the investment. Value tracked against the original estimate.
- **Vendor and procurement oversight.** Governed 25 to 60 systems integrator and contract resources per program. More than 100 on the Byrne program. Statements of work and deliverable acceptance and day to day execution managed against the plan.
- **Full lifecycle and SDLC.** Discovery to design to build to test to cutover to hypercare. Hybrid Agile and Waterfall. More than 100 RICEFW objects delivered.
- **Team leadership, coaching and staffing.** Supervised cross functional program teams. Staffed programs with employees and contract resources. Coached team members and reviewed their work for quality. Managed performance against clear goals.
- **Process improvement and lessons learned.** Lessons learned session at the end of each delivery. Findings go into the next plan. Super user networks and adoption tracking after go-live. Close attention to detail on every control and artifact.

LIVE WEB APPLICATIONS I BUILT AND DELIVERED

- **PPM Control Tower.** Program and portfolio dashboard with workstream health, budget, milestones and risks. aierppm.clarkfamilyusa.com/ppm.html
- **Spyglass Operations Control Tower.** Executive view of program operations and delivery status. aierppm.clarkfamilyusa.com/spyglass.html
- **Inventory Sync, warehouse system to ERP.** Web application that shows inventory sync status between the warehouse system and the ERP. aierppm.clarkfamilyusa.com/inventory-sync.html
- **BPR and BPM Experience.** Procure to pay current state and future state process maps with gaps and controls. aierppm.clarkfamilyusa.com/bpr.html

ORACLE CLOUD DELIVERY AND CLOSE RECOVERY

- Sequence the close in the Oracle order: Payables, Receipt Accounting and Cost Management, Projects, Assets, Receivables, Subledger Accounting, General Ledger. Clear the Period Close Exceptions Reports subledger by subledger.
- Decide the process rules that block closes: accrue at receipt or period end, match tolerances, hold ownership and SLA, work order close rules, resource rates, cost cutoff dates.
- Rebuild failing integrations on one hardened pattern with retry, replay, idempotency and monitored error handling so interfaces stop creating new exceptions.

ORACLE CLOUD AND TECHNICAL PROFILE

Oracle Fusion Cloud: Financials (GL, AP, AR, Subledger Accounting), Procurement, Inventory, Cost Management and Receipt Accounting, Manufacturing, Order Management, Warehouse Management, HCM. Oracle Integration Cloud, REST and BI Publisher. Service Logistics and Depot Repair: process flow and close impact studied, not configured.

SAP S/4HANA Cloud: Finance, Supply Chain, Production Planning, Manufacturing, Distribution.

Manufacturing systems: MES, SCADA, scales and warehouse systems integrated to ERP inventory and cost transactions. 100+ RICEFW objects. 20+ OIC integrations.

Program tools: MS Project, Excel, Visio, PowerPoint and SharePoint. Lucidchart and BPMN, Miro. Financial systems: Oracle Fusion Financials and Cost Management, SAP S/4HANA finance. AI: Oracle AI Agent Studio (certified), Claude, Azure AI Search knowledge libraries.

EXPERIENCE

Principal Consultant, Oracle Cloud Process and Integration | Trade Genius Inc, Crofton, MD **2025 to 2026**

- **Beverage Manufacturing plant integration.** Documented plant floor processes and mapped each event to the Fusion Inventory, Manufacturing and Order Management transaction. Connected MES, scales and warehouse systems through OIC to the map. Result: inventory and cost accuracy remediated at the ERP to plant boundary.

ERP Transformation Partner and Executive Advisor | Byrne Dairy, \$1B dairy and CPG, Syracuse, NY **2021 to 2025**

- Led seven Oracle Fusion go-lives in five years, including data migration, finance, purchasing, HCM and warehouse management. Result: all seven on time and on budget. Each closed on schedule in month one.
- Chaired the executive steering committee. Governed more than 100 systems integrator and contract resources. Held 97 percent or better EVM budget accuracy and 90 percent or better milestone compliance on a portfolio above \$25M.
- Designed the target operating model across finance, procurement, manufacturing and supply chain. Documented current state and future state at levels 1 to 4 for procure to pay, order to cash, record to report and plan to produce before configuration started. A level 3 swimlane map, a gap register and a RACI for every process family.
- Decided receipt rules, match rules, hold ownership and accrual method with the business and drew them on the maps. Result: Payables closed on day two in the first month after go-live.
- Mapped MES, SCADA and warehouse events to Oracle inventory and cost transactions. Built more than 20 OIC integrations to the map. Retired eleven legacy applications. Result: 40 percent fewer cross system inventory mismatches.
- Wrote the level 4 work instructions and built training and super user networks from them. Tracked adoption by ticket class after each go-live. Closed each go-live with a lessons learned review. Deployed production AI agents in Oracle AI Agent Studio for inventory reconciliation with human in the loop review, after the process was stable.

Chief Information Officer (CIO) | MDVAMILK, \$1B dairy manufacturer, Reston, VA **2017 to 2021**

- Led selection and implementation of SAP S/4HANA Cloud across finance, supply chain, manufacturing, production planning and distribution for multi site dairy operations. Documented current state and redesigned finance and supply chain processes into the S/4HANA process model. Owned process design, business requirements and cutover.
- Established cybersecurity and compliance governance while protecting operational agility.

Vice President, Technology | SCORE, Herndon, VA **2015 to 2016**

- Built multi year technology roadmaps and governance. Oversaw an enterprise CRM implementation supporting thousands of users nationwide.

SVP, Information Management | NeighborWorks America, Washington, DC **2013 to 2015**

- Led enterprise platform modernization for more than 100,000 end users. Implemented delivery frameworks that improved transparency and outcomes.

Vice President and Chief Strategy Officer | Iconixx, \$85M global systems integrator, Bethesda, MD **2000 to 2002**

- Built the integration and reorganization strategy behind corporate acquisitions. Technology due diligence and P and L analysis. Led a 25 person software integration team.

President and CEO | Internet Information Services Inc. (IIS), Bethesda, MD **1994 to 2000**

- Founded and grew the firm to 100 professionals and more than \$20M revenue. Clients included Verizon, GEICO, T. Rowe Price and Time Warner. Sold to Iconixx in 2000.

Earlier venture: network security devices and SaaS | Product leader, US, Israel, Taiwan **Exited**

- Led four consumer network security appliances to market in 24 months. Named on an international patent with 65 claims. Successful exit.

EDUCATION, CERTIFICATION AND RECOGNITION

B.S., Technology Management, American University. · **Oracle AI Agent Studio**, certified. · **2025 Award Winner**, Oracle ERP Supply Chain Excellence.
